### SUMMARY

Dynamic MIS Trainees at HOCHENG PHILIPPINES CORPORATION with skills in PHP and 3D modeling. Successfully created a 3D Bathroom Simulation Layout System with Three.js; this shows the ability and creativity to solve problems. Other programming languages and tools are also under my purview. An innovative mind always strives to produce something unique for an exceptional user experience.

A hard worker, self-motivated, and willing to apply combined knowledge and skills toward enhancing business performance. I can work independently or as a team member in a challenging and fast-paced environment while using my work ethic developed through years of training and experience to adapt quickly to changing processes and achieve company goals. I am a creative problem-solver who takes action and is committed to implementing solutions that promote organizational growth and operational efficiency.
